Kuala Lumpur, Malaysia/August 15th-18th, 2018

**Executive Committee
of WORLDSIVA - Onlus**

President

Quirino Piacevoli - Italy

Vice President

Primitivo Rendom - Mexico

Nikolaj Petrov - Bulgaria

Susilo Chandra - Indonesia

Secretary

Antonio Clemente - Italy

Dear Colleagues

Just over a few days have passed since the Timisoara meeting. The success of the meeting exceeded all our expectations and I think we can truly consider this to have been an exceptional congress, with more than 1300 participants.

It is an honour and a great pleasure for me to invite and welcome you to the next 6th World Congress of Intravenous Anaesthesia and Target Controlled Infusion, that will be held in Kuala Lumpur - Malaysia, from the 15th to 18th of August 2018.

I am sure you are aware that the scientific society ,World SIVA, was constituted by the Faculty of the Congress during the meeting in Venice, on 29th September 2007, which acted as the voting Assembling. The coming together of a non profit scientific society can only but enhance the future of TIVA-TCI. The Board of Directors reflects the international aspect of the Society, confirming the scientific collaboration we encourage. I am confident that they will continue to make outstanding contributions to our Scientific Society also in this important meeting in collaboration with the Malaysian Society of Anaesthesiologists, the College of Anaesthesiologists and the Academy of Medicine of Malaysia.

During the Congress we will explore the scientific application of anaesthesia, intensive care management, looking ahead and highlighting how best we can apply these techniques in the future. We have an excellent, broad-based Scientific Programme Committee. The SPC is working on an attractive and ambitious programme, which will cover all the different multi-disciplinary aspects of research and medical practice in our field. Refresher Courses, Plenary Lectures, workshops and poster presentations will both encourage interaction and inspire exchange between participants.

A comprehensive Industrial Exhibition, and sponsored Satellite Symposia, will perfectly complement the scientific content.

Finally, and certainly not least, may I thank all the Faculty for the exceptional support to the next groundbreaking meeting. The results I have just outlined, together with the high number of scientific contributions could never come together without the kind of scientific support all the speakers will give. **I think we can agree that the next event will be a success for all involved.**
